Lecturer, CYTER

About CYTER:

Modern medical advancements provide rationale for integration of various traditional healing techniques to promote healing, health and longevity. Thanks to the foresight of management and administrators of Sri Balaji Vidyapeeth, CYTER was started on 1st Nov 2010 at MGMCRI.

Yoga consultations are part and parcel of all Master Health check-ups offered by our Hospital services thus integrating the modern and the ancient even at the entry level itself with quality of life enhancing benefits for nearly 55,000 patients.

At CYTER we have an integrated set up where we are educating future Yoga therapists while simultaneously helping patients recover from illnesses and at the same time developing an understanding through scientific research. To further this vision and mission, MOUs have been signed with Kaivalyadhama Yoga Institute, Amity University and Dev Sanskriti Vishwavidyalaya.

CYTER is the only University based Yoga Therapy School in India to receive Member School status of the International Association of Yoga Therapists (USA), and its director is serving on National Board for Yoga in Ministry of AYUSH & Consultant WHO.

The Govt. of India is currently promoting indigenous systems of health through AYUSH as the limitations of modern medicine in managing stress induced psychosomatic, chronic illnesses are the strength of Yoga. Hence a holistic integration of both systems enables best quality of patient care at CYTER, SBV.

CYTER offers various Yoga Therapy programmes ranging from PG certificates to the PhD level. Extensive opportunities are provided for clinical experience for all trainees. CYTER is constantly adding to the research based, empirical evidence in Yoga Therapy with 19 completed and 10 ongoing research projects. 89 papers, 3 chapters in books, 9 copyrights, 11 compilations and 31 abstracts have been published in national and international journals highlighting immediate, short term as well as long term, health enhancing benefits of Yoga training and Yoga Therapy programs.
