**INTRODUCTION TO INTER-DISCIPLINARY
VALUE ADDED SHORT TERM CREDIT BASED CERTIFICATE PROGRAM
(TO BE STARTED FROM SEPTEMBER 2019)**

Recognising the importance of Value added courses in Health sciences and also fully realizing the contribution of a tertiary care hospital to the growth of higher education institutions in health sciences, these certificate programmes have been chalked out. These are essentially SBV credit based courses. The courses are of SHORT duration and aimed at creating suitable job opportunities along with enhancing the knowledge upon the completion of the certificate course. The courses will be duly certified at the INSTITUTE LEVEL.

The Value added and need based courses that are of inter-disciplinary nature have been enabled with a view to promulgating an inter-disciplinary approach to strengthen the armamentarium of conventional courses facilitated by the regulatory councils. Such inter-disciplinary courses could pave the way for enhanced perception and comprehension in health sciences viewed through a kaleidoscopic perspective of various subjects in different disciplines, as applied to Medicine, Dentistry, Nursing sciences, allied Health Sciences and even complementary and adjuvant medicine that includes music therapy and yoga therapy.

The uniqueness of the course lies in its ability to link with various National and International knowledge partners along with involving various eminent external resource persons as per directives of Vice Chancellor. External knowledge partner / external resource person will enrich the learning experience of the participants.
