

## **SRI BALAJI VIDYAPEETH (SBV)**

(Deemed to be University)  
U/S3 of UGC Act 1956  
Puducherry-607402

SBV is a regional leader in e-learning. SBV's first learning Management System based on Moodle was installed in 2013. Since 2015, Moodle was replaced by Ganesha's Canvas, based on the Canvas LMS – used by top universities in the world.

Facilities for e-content development at Sri Balaji Vidyapeeth include well-planned and equipped physical infrastructure facilities, supported by technical staff for efficient operations and trained faculty for effective utilisation of the facilities.

### **Physical Infrastructure Facilities:**

The Institution has a number of dedicated facilities for creation of e-learning multimedia material. The **SBV eLearning Studio** features top of the line audio and video production studio facilities for recording video lectures, webinars, interviews, talk shows, podcasts, demonstrations, etc. The Institute's BigBlueButton, Zoom and Cisco WebEx allows all the faculty to hold live classes and record them into teaching modules from anywhere. This facility was used extensively during the COVID19 lockdown.

Every departmental laboratory, surgical theatre, etc., are equipped with digital capture tools including cameras to record procedures, experiments, slides, samples and other teaching materials, to be stored safely and used for teaching.

### **ICT Facilities:**

SBV has implemented ICT facilities to store, publish and disseminate the produced e-learning multimedia materials such as Omerka, DSpace, Greenstone, etc.

The SBV campus computing facilities include a robust data center with SANAT storage area network implemented in 2016. These infrastructure are regularly updated and augmented to keep up with the institution's growing needs and technological changes.

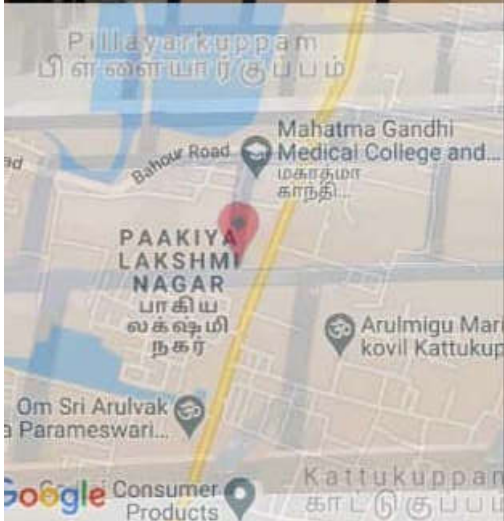

### **Vital Statistics**

SBV has 28 Pan Tilt Zoom (PTZ) cameras, of which 20 are high definition (1080p) resolution that capture digital videos that are edited on Adobe Premiere Pro software.

More than 1200 sessions of classes and sessions are captured and available on the cloud for students to watch.

The learning management system allows students to access the learning materials in a very personalised pathway that is determined by their year and course of study.
